

Mechanical Building Design and Energy Consulting

- * HVAC Engineering and Design for your Projects including design/build, system and equipment selections and duct layouts utilizing Wrightsoft Right-Suite Software with ACCA & ASHRAE methodology.
- * TITLE 24 Performance Calculations using Energy-Pro Software. We provide the Title 24 CEC Residential and Non-Residential Calcs, Forms and CalCERTS Registration.
- * Mechanical design and constructability reviews with a Design/Build Approach
- * Construction coordination design and field services
- * Design/construction verifications
- * Code compliance plan reviews. CABEC CEPE (Certified Energy Plans Examiner)
- * LEED Accredited Professional services
- * Coordination interface with Owner, AE, and other Contractors
- * Commissioning planning and documentation services
- * Procurement support

Registrations, Memberships and Certifications

- ♦ CA Mechanical PE Registration #25713
- ♦ CA C20 and C36 Contractor's License #914451
- ♦ CABEC (California Association of Building Energy Consultants) CEPE (Certified Energy Plans Examiner)
- ♦ CaICERTS HERS Rater Certification for Non-Residential and Residential
- ♦ ASHRAE Professional Certification in Operation & Performance Management
- ♦ LEED Accredited Professional and Member USGBC: U.S. Green Building Council
- ♦ Member ASHRAE, ACCA (Air Conditioning Contractors Association), ASPE (American Society of Plumbing Engineers), and AFE (Association of Facility Engineers)

Harold Cullick, Principal PE, LEED AP

Harold Cullick is a registered, professional mechanical engineer in California, Arizona, Colorado, Oregon & Louisiana. He is a LEED accredited professional and licensed heating, ventilating and air conditioning contractor in California.

Harold has over 18 years' experience in mechanical engineering design and an additional 15 years in construction project and design management. This provides our customers with the unique ability to design cost effective, energy efficient systems using the latest software tools for design/build projects. As a California HERS rater, Harold can provide the documents for third party certification including CF-1R, CF-6R and CF-4R forms as well as the equivalent non-residential forms for your commercial projects.

As a manager and engineer for design/build projects, he has provided drawings, specifications and performed contract negotiations for procuring material & high value equipment for mechanical contractors, owners, architects and engineering EPC firms.

Harold has personally managed \$50-60M projects to completion and \$150M portions of billion dollar projects. He has managed and performed startup/commissioning for building systems and mechanical/HVAC systems for peak energy performance and operational stability as well as documenting startup capacities.

His extensive consulting experience with both large and small projects over a wide variety of commercial and industrial applications has given him a unique ability to be a representative for contractors and owners.

**LET US SHOW YOU THE RESULTS
WE CAN DELIVER FOR YOU!!**
